
Ecoscape Kids
BOOK 7
Maya & Eli's Tiny Garden Helpers
Bugs & Garden Helpers Coloring Book

ECOSCAPE
OUTDOOR SERVICES, LLC

Welcome to Ecoscape Kids!

At Ecoscape Outdoor Services, we care about the families who enjoy the outdoor spaces we maintain. We created Ecoscape Kids to help children learn about plants, lawn care, and caring for nature through coloring.

Each page introduces a simple outdoor lesson. Children will learn alongside friendly characters while practicing creativity, observation, and reading with a parent or caregiver.

We hope this book inspires your family to spend time outside, ask questions, and enjoy learning together.

Ecoscape Outdoor Services

Lawn care and landscaping for your home.

This book belongs to: _____

Meet Maya and Eli

Maya and Eli look for tiny garden helpers.
They watch gently and leave each creature in its home.

A Ladybug on a Leaf

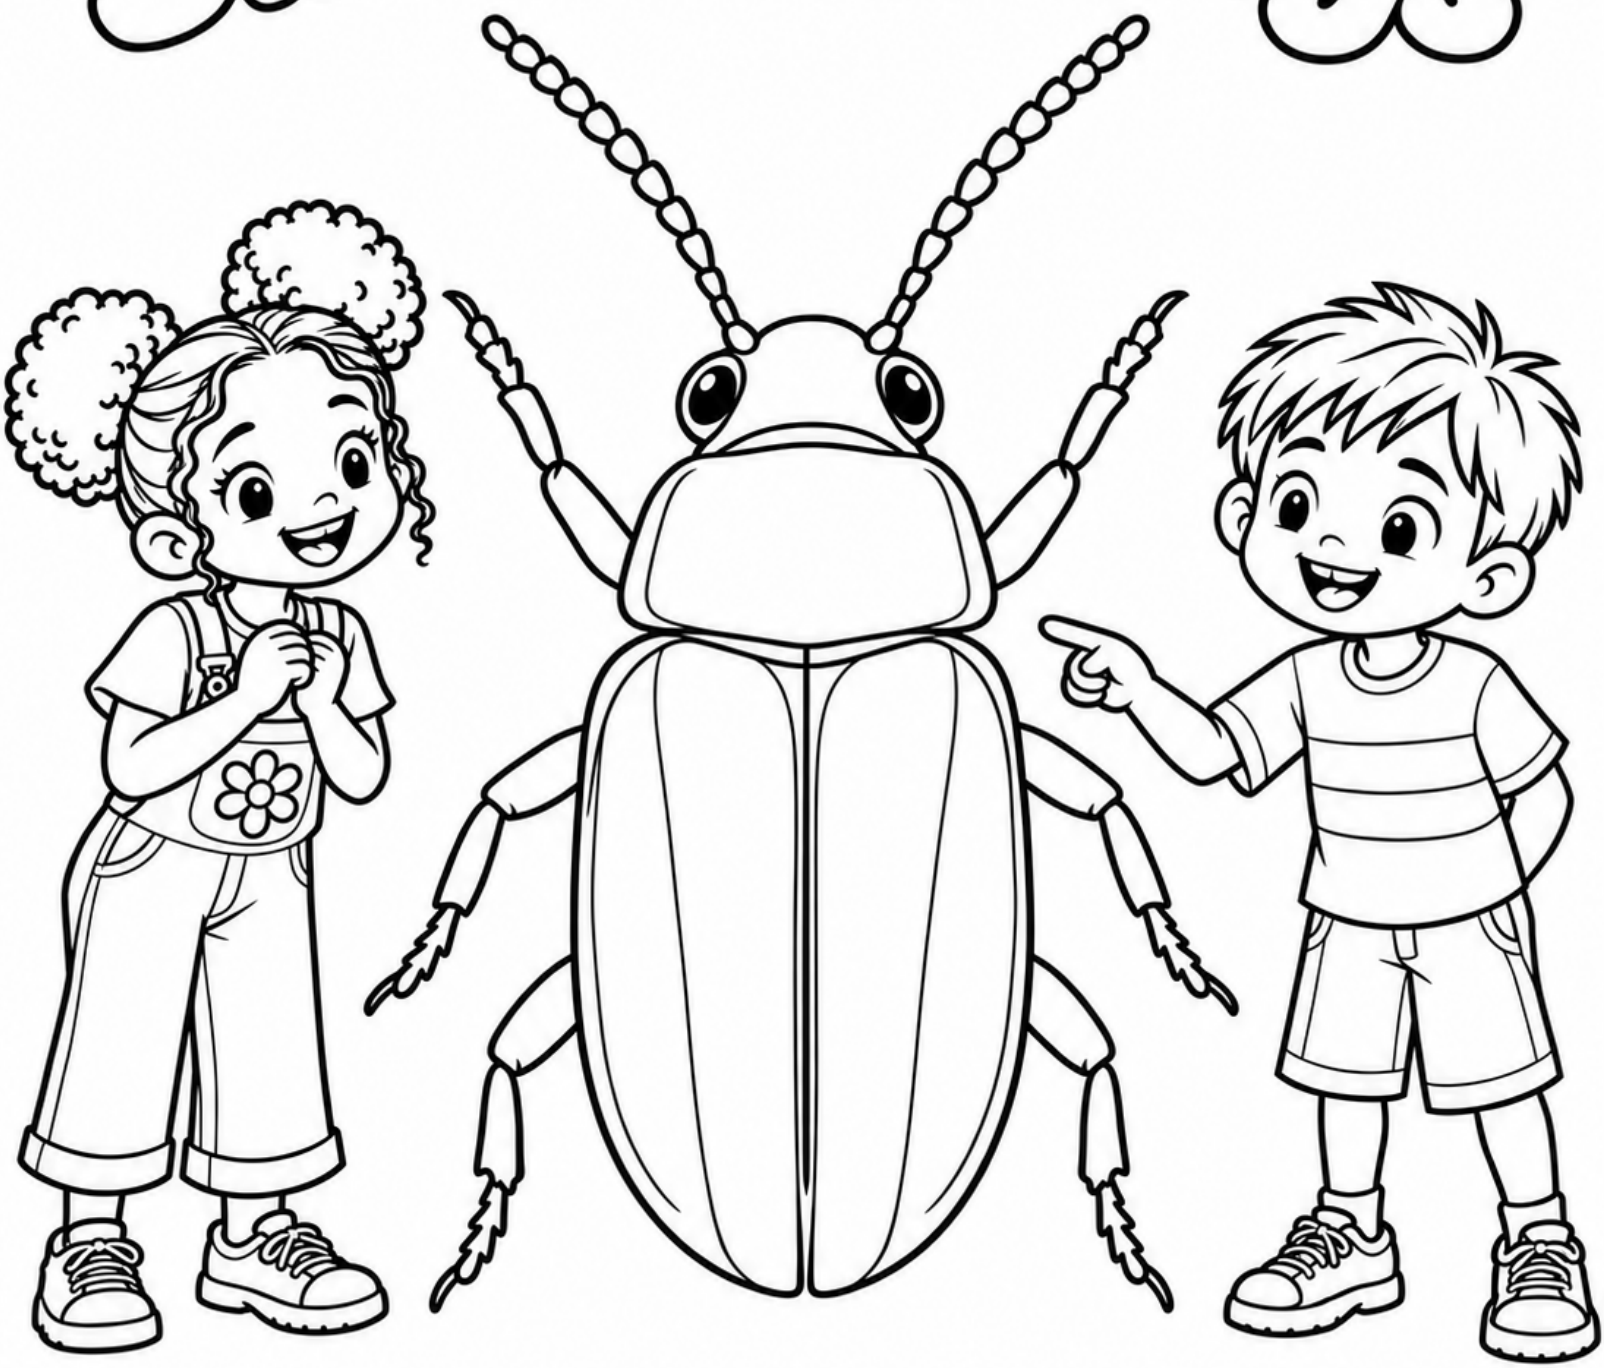

Ladybugs are beetles with small, rounded bodies. Many ladybugs eat aphids that feed on plants.

Tiny Aphids

Aphids are small insects that drink plant sap.
Ladybugs can help keep their numbers down.

Six Little Legs

Adult insects have six legs.
Eli counts three legs on each side.

A Bee Visits a Flower

Bees visit flowers for nectar and pollen.
Pollen can travel with a bee to other flowers.

Flower to Flower

Bees carry pollen as they move among blooms.
This helps many plants make seeds.

A Butterfly Visitor

Butterflies sip nectar from flowers.
They can carry pollen as they visit.

An Egg on a Leaf

A butterfly begins life as a tiny egg.
Maya spots one resting on a leaf.

A Hungry Caterpillar

A caterpillar hatches from a butterfly egg.
It eats leaves as it grows.

A Quiet Chrysalis

A chrysalis protects a changing butterfly.
Inside, the caterpillar becomes an adult.

Wings Unfold

A new butterfly opens its wings.
It rests while the wings grow firm.

A Green Lacewing

Adult green lacewings have delicate wings.
Their young can eat tiny plant pests.

A Hover Fly Hovers

Hover flies can pause in the air.
Many adults visit flowers for nectar and pollen.

A Dragonfly Perch

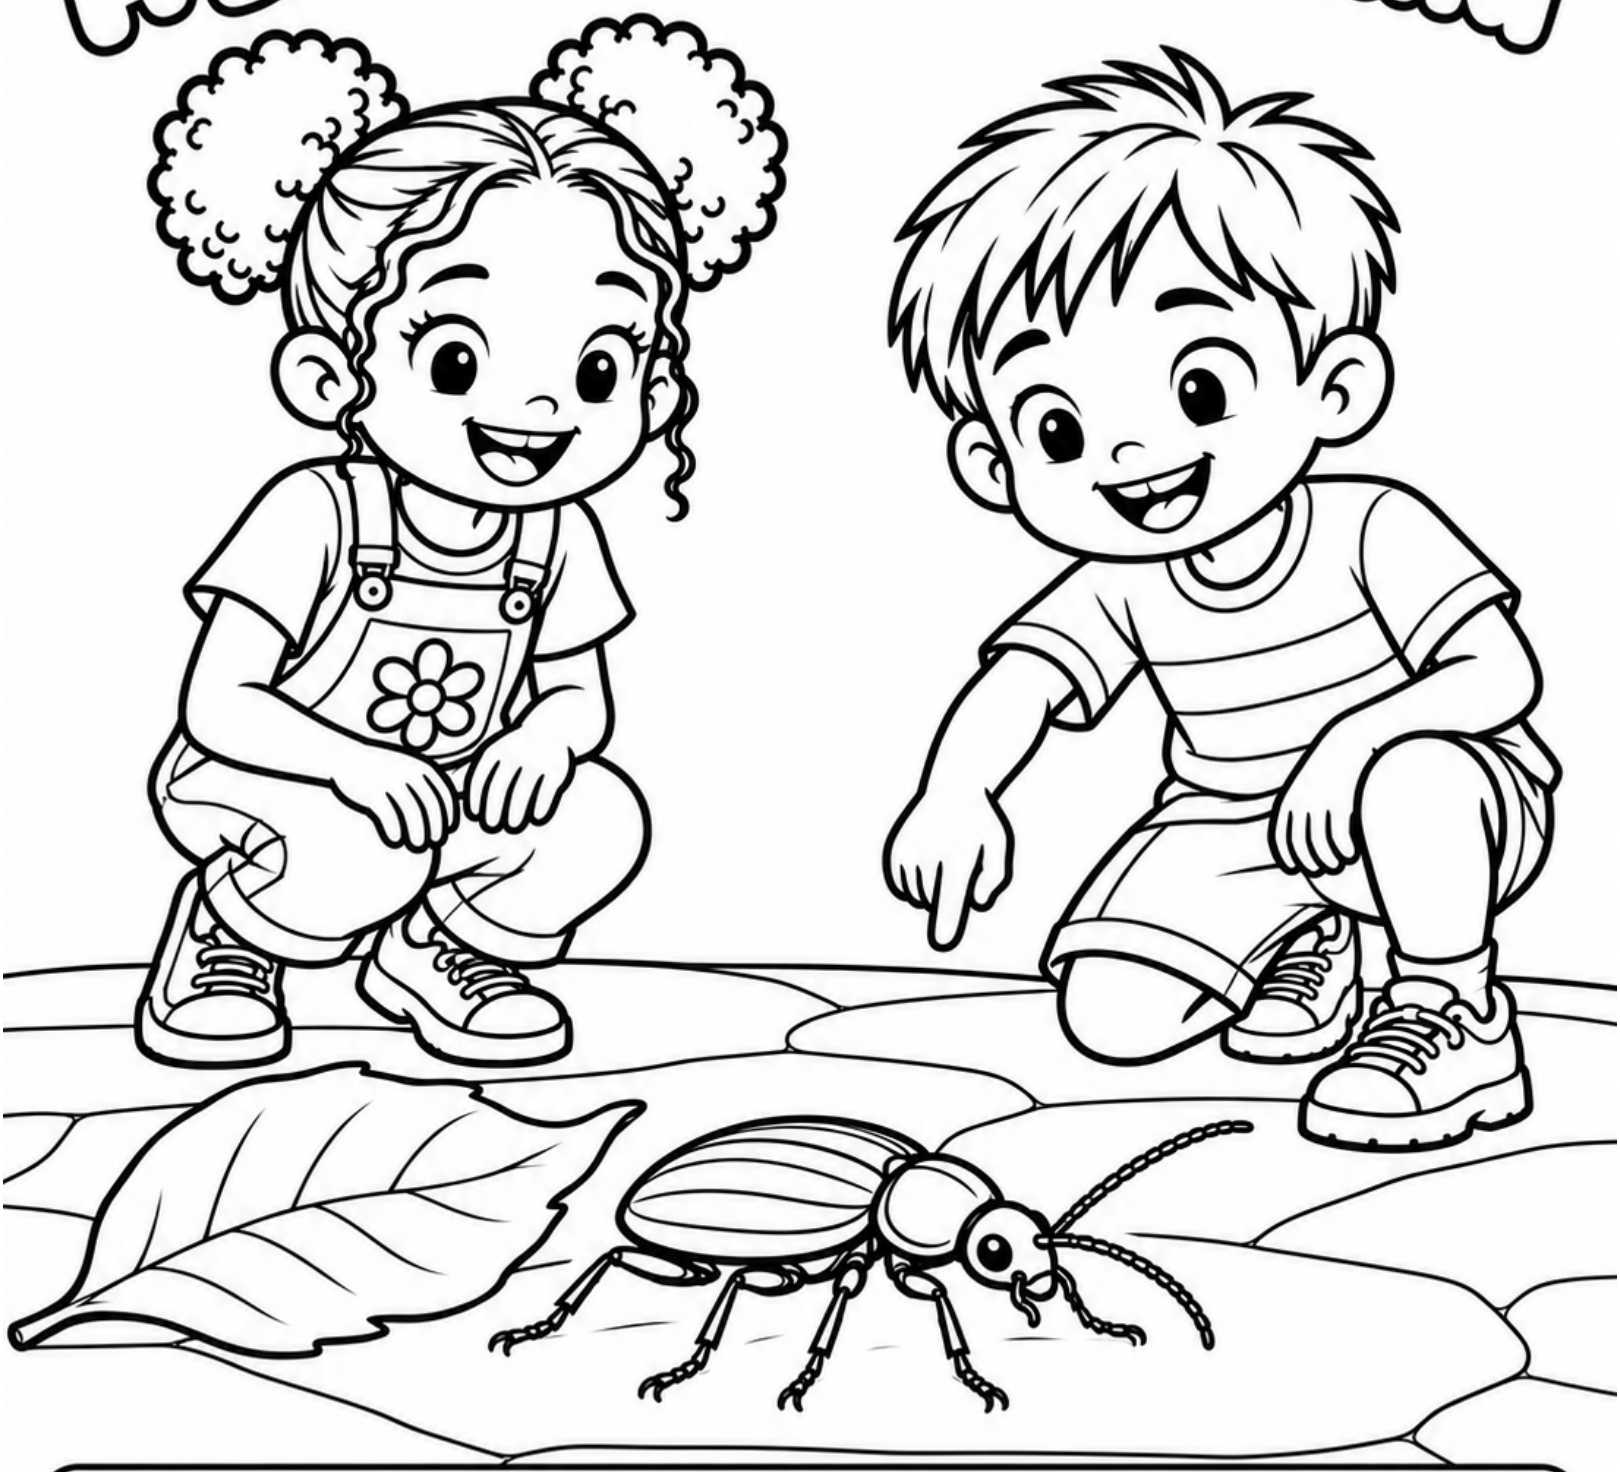

Dragonflies have two pairs of wings.
They catch small insects in the air.

A Patient Mantis

A praying mantis waits for insects to come near.
Its folded front legs can catch a meal.

A Beetle on the Ground

Many ground beetles hunt other small creatures. They often hide beneath leaves during the day.

A Spider Is Different

Spiders have eight legs.
They are garden neighbors, but they are not insects.

A Web Catches Insects

Some spiders spin webs to catch insects.
Eli gives the delicate web plenty of space.

An Earthworm Below

Earthworms move through the soil.
Their tunnels help air and water reach below.

Under a Fallen Leaf

Pill bugs often shelter in damp places.
They help break down dead plant material.

Leaves Become Soil Food

Tiny creatures help break down fallen leaves.
This returns nutrients to the soil.

Flowers for Visitors

Different flowers welcome different visitors.
Maya and Eli grow a place for pollinators.

Look Without Touching

Garden creatures need space to stay safe.
Maya and Eli enjoy watching without touching.

Tiny Helpers, Big Garden

Tiny garden helpers have many important jobs.
Maya and Eli will keep learning as they grow.
