
Ecoscape Kids
BOOK 8
Sofia & Miles's Shady Tree Adventure
Trees, Palms & Shady Places Coloring Book

ECOSCAPE
OUTDOOR SERVICES, LLC

Welcome to Ecoscape Kids!

At Ecoscape Outdoor Services, we care about the families who enjoy the outdoor spaces we maintain. We created Ecoscape Kids to help children learn about plants, lawn care, and caring for nature through coloring.

Each page introduces a simple outdoor lesson. Children will learn alongside friendly characters while practicing creativity, observation, and reading with a parent or caregiver.

We hope this book inspires your family to spend time outside, ask questions, and enjoy learning together.

Ecoscape Outdoor Services

Lawn care and landscaping for your home.

Meet Sofia and Miles

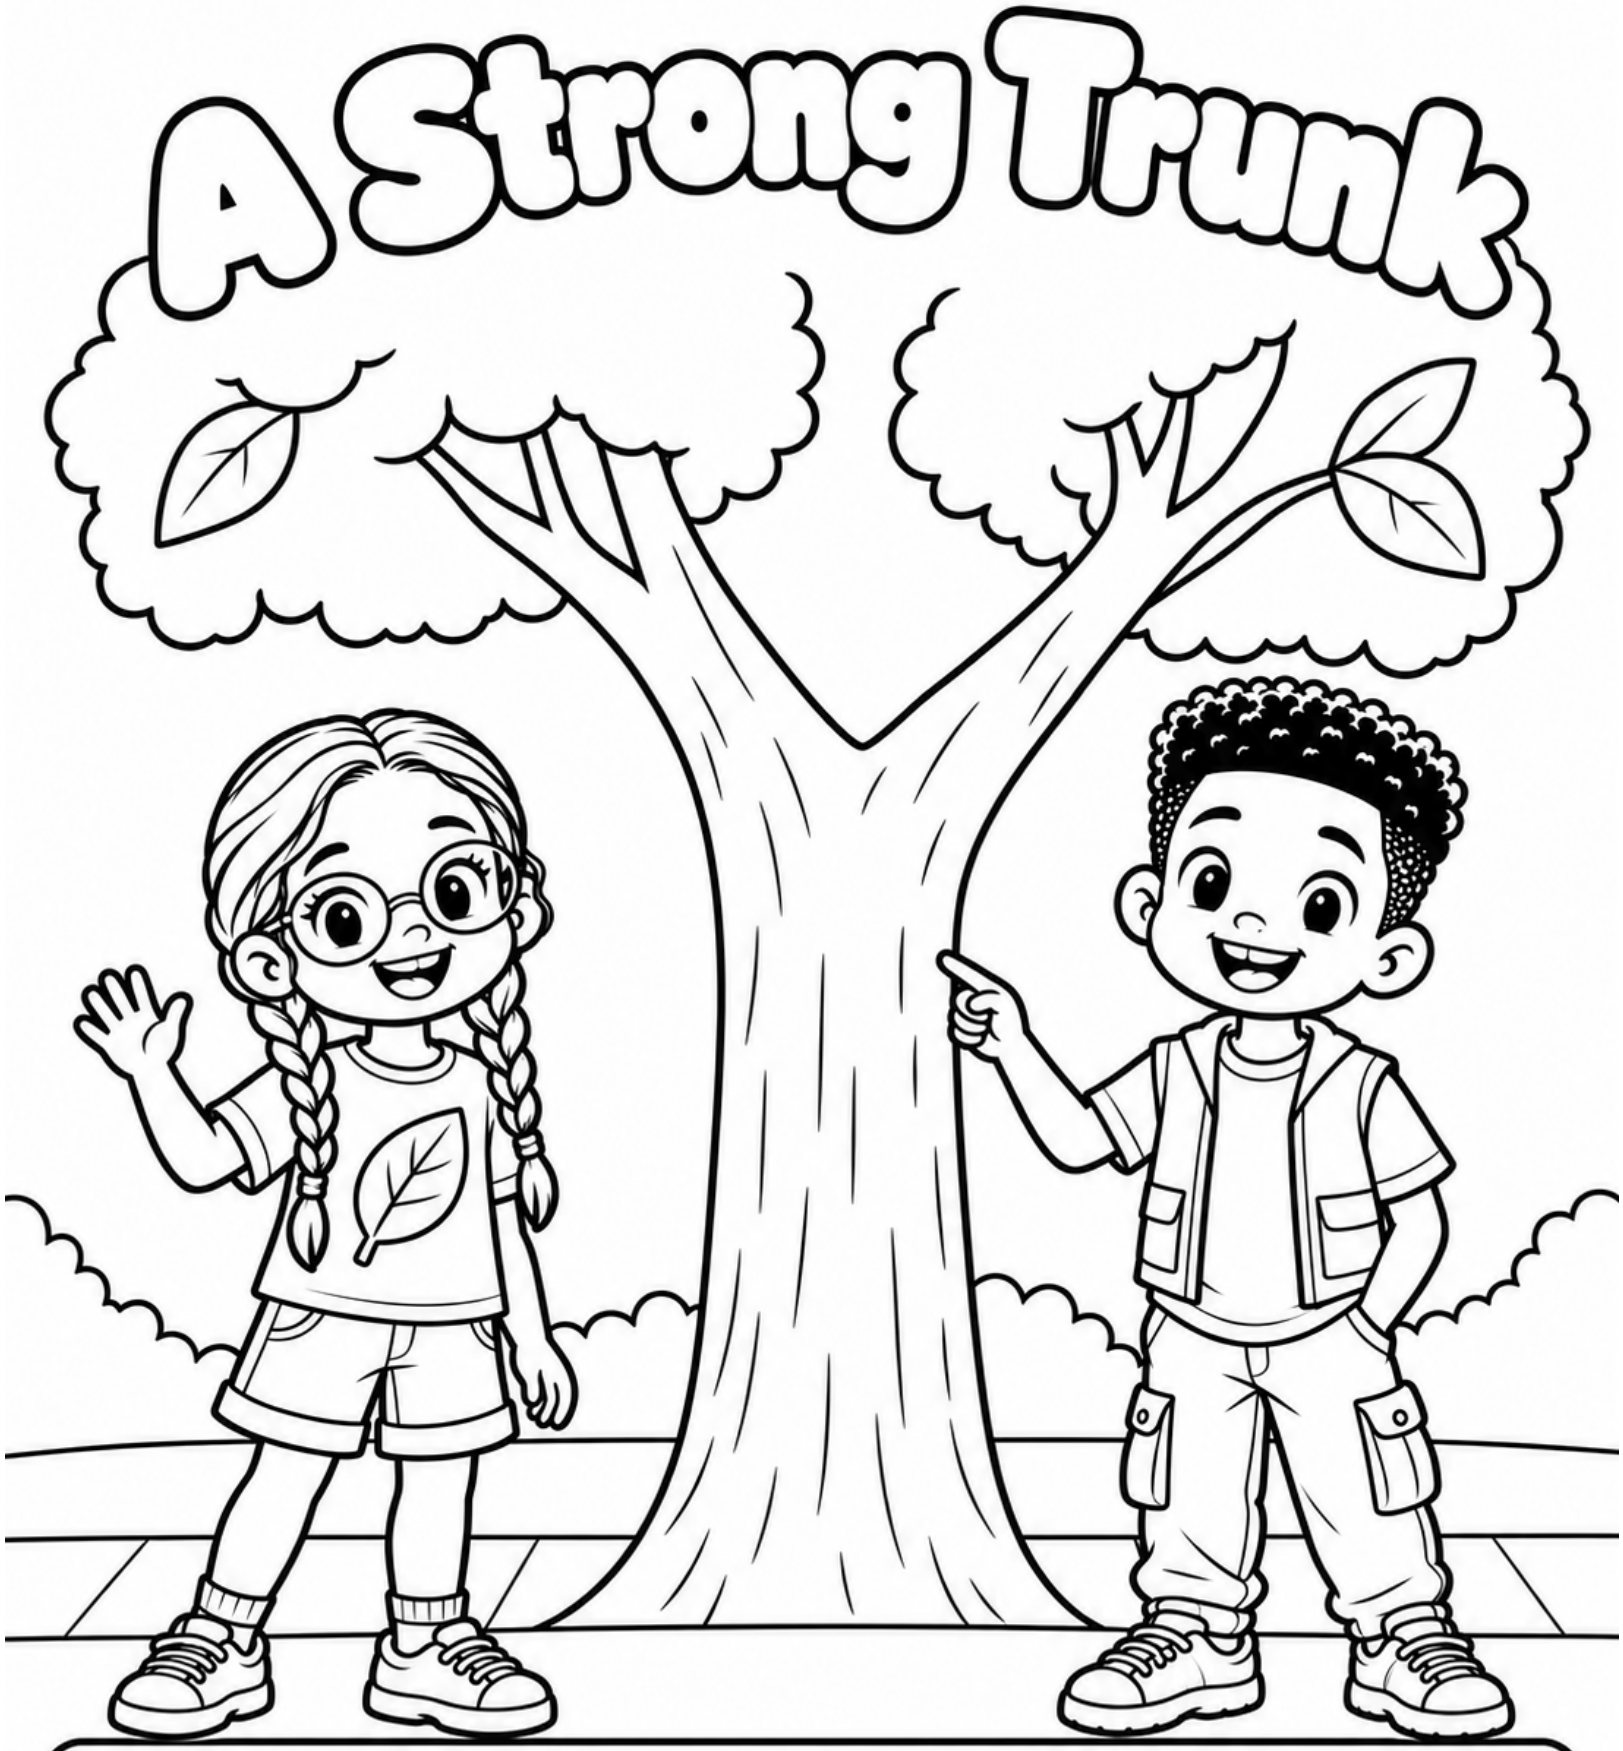

Sofia and Miles explore trees and palms.
Their shady adventure starts with a closer look.

Roots Below the Ground

Roots anchor a tree in the soil.
They take in water and nutrients.

A Strong Trunk

A trunk supports the branches and leaves.
Water travels upward inside the tree.

Bark Protects a Tree

Bark forms a protective outer covering.
Sofia looks at the patterns on the trunk.

Branches Reach Out

Branches hold leaves toward the light.
Miles follows their shapes with his eyes.

Leaves Make Food

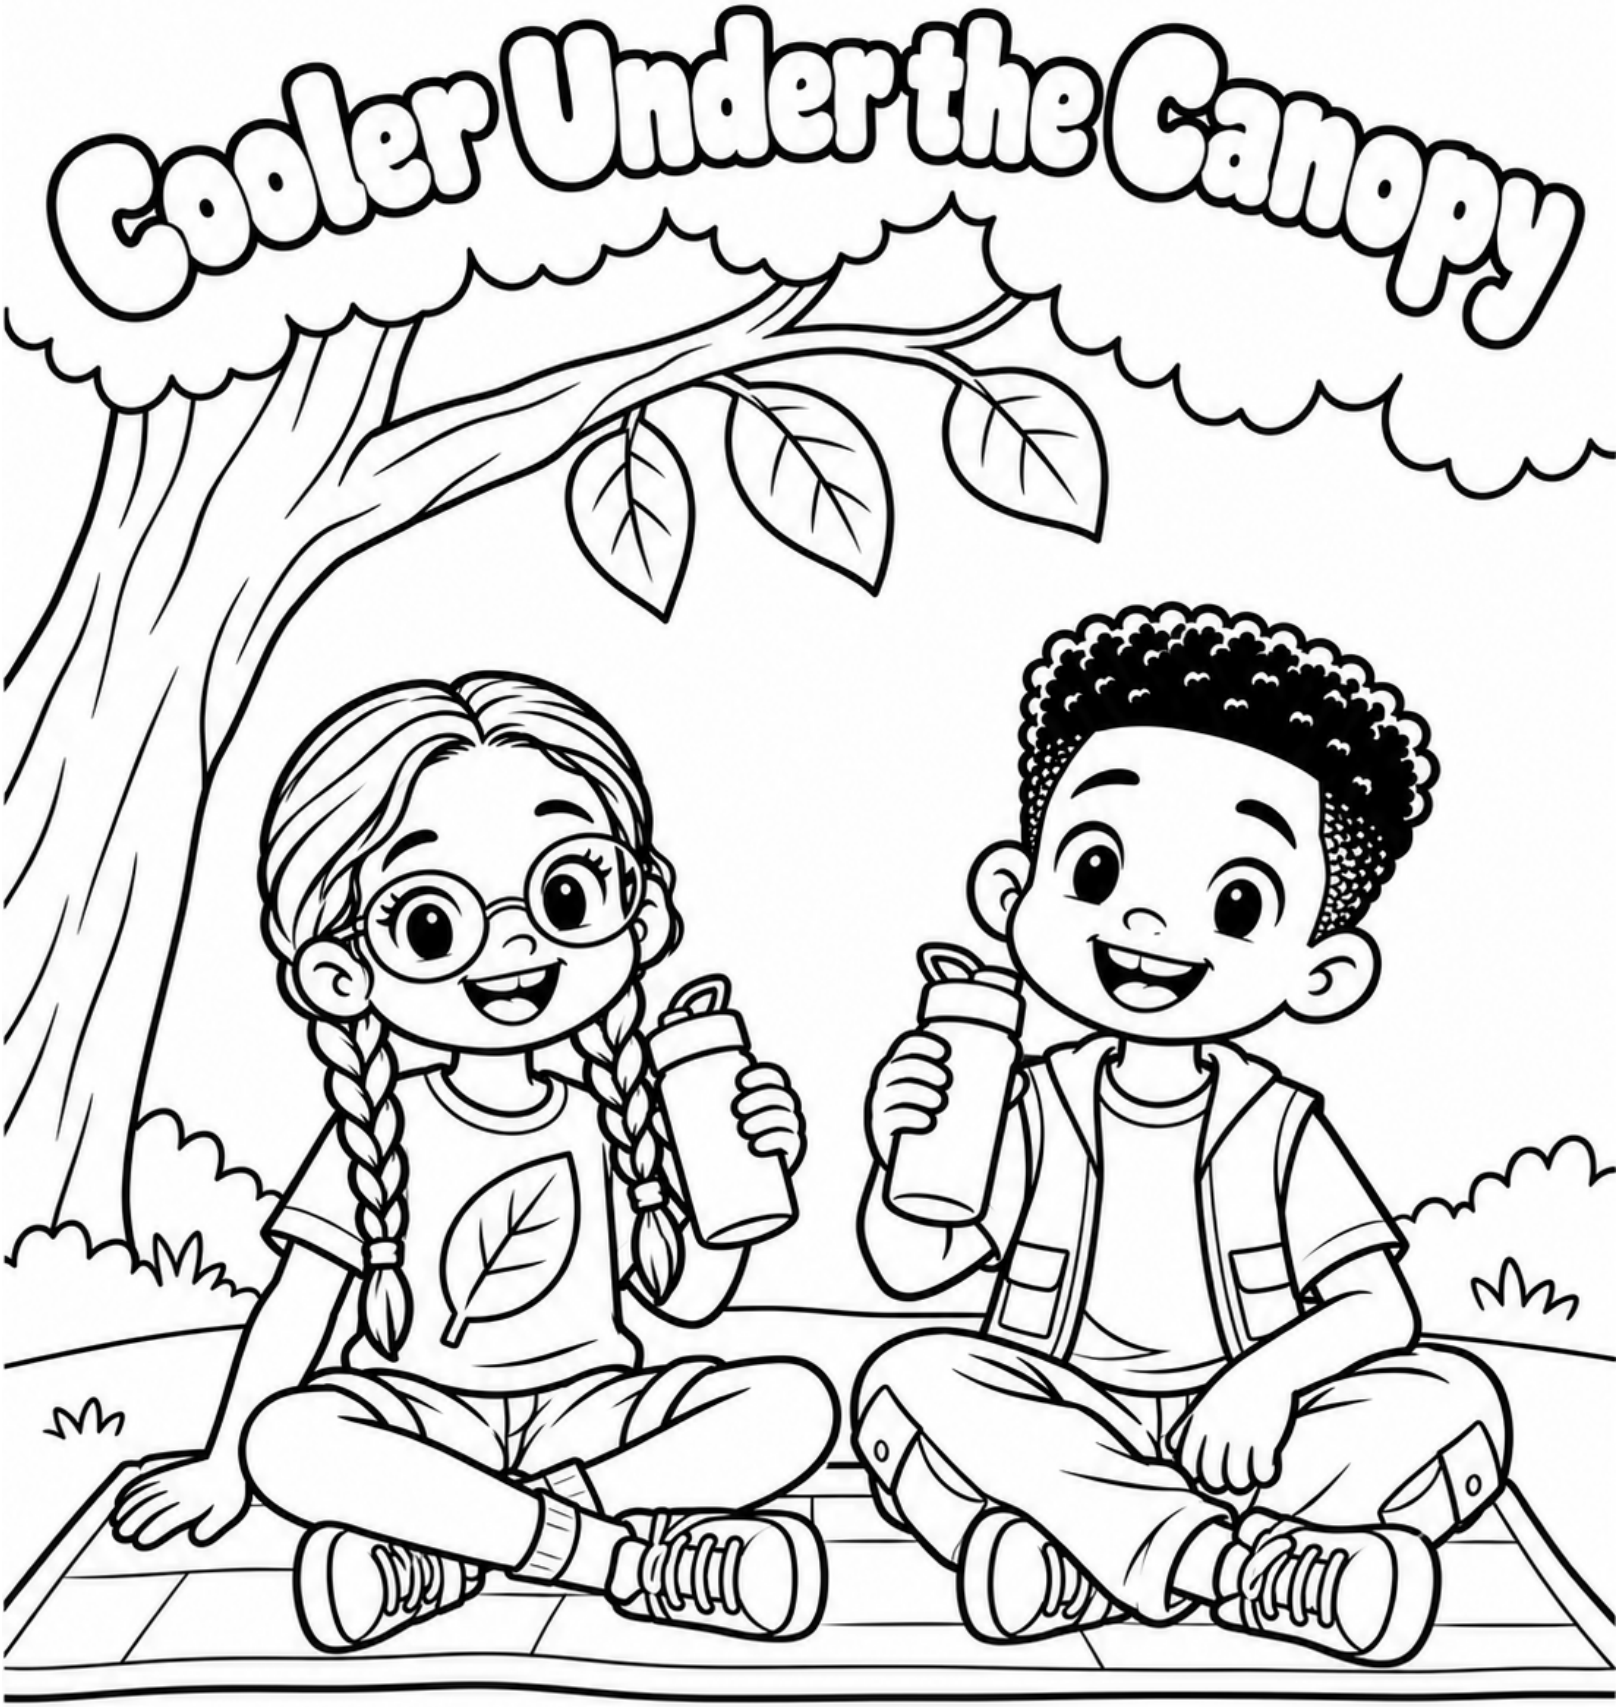

Leaves use sunlight to make food.
This helps the tree grow.

A Tree Gives Shade

Leaves block some of the sun's light.
Sofia and Miles rest beneath the branches.

Cooler Under the Canopy

Shade offers a cooler place to rest.
The children take a break and drink water.

An Oak and Its Acorns

An acorn is the seed of an oak tree.
A new oak starts when an acorn sprouts.

A Tiny Tree Begins

A seedling is a young plant.
Its roots and leaves grow a little at a time.

A Palm Has Fronds

Palm leaves are called fronds.
They grow from the top of the palm.

A Fan-Shaped Frond

Some palm fronds spread like a fan.
Sofia notices the broad, spreading shape.

A Feather-Shaped Frond

Some palm fronds have leaflets along a stem.
Miles looks at their feather-like shape.

Pine Needles

Pine trees grow slender leaves called needles.
Many pines hold their needles in small bundles.

Seeds in a Pine Cone

Pine cones protect developing seeds.
Mature cones open to release the seeds.

A Magnolia Blossom

Magnolias grow large, beautiful flowers.
Sofia spots one among the broad leaves.

Mangroves by the Water

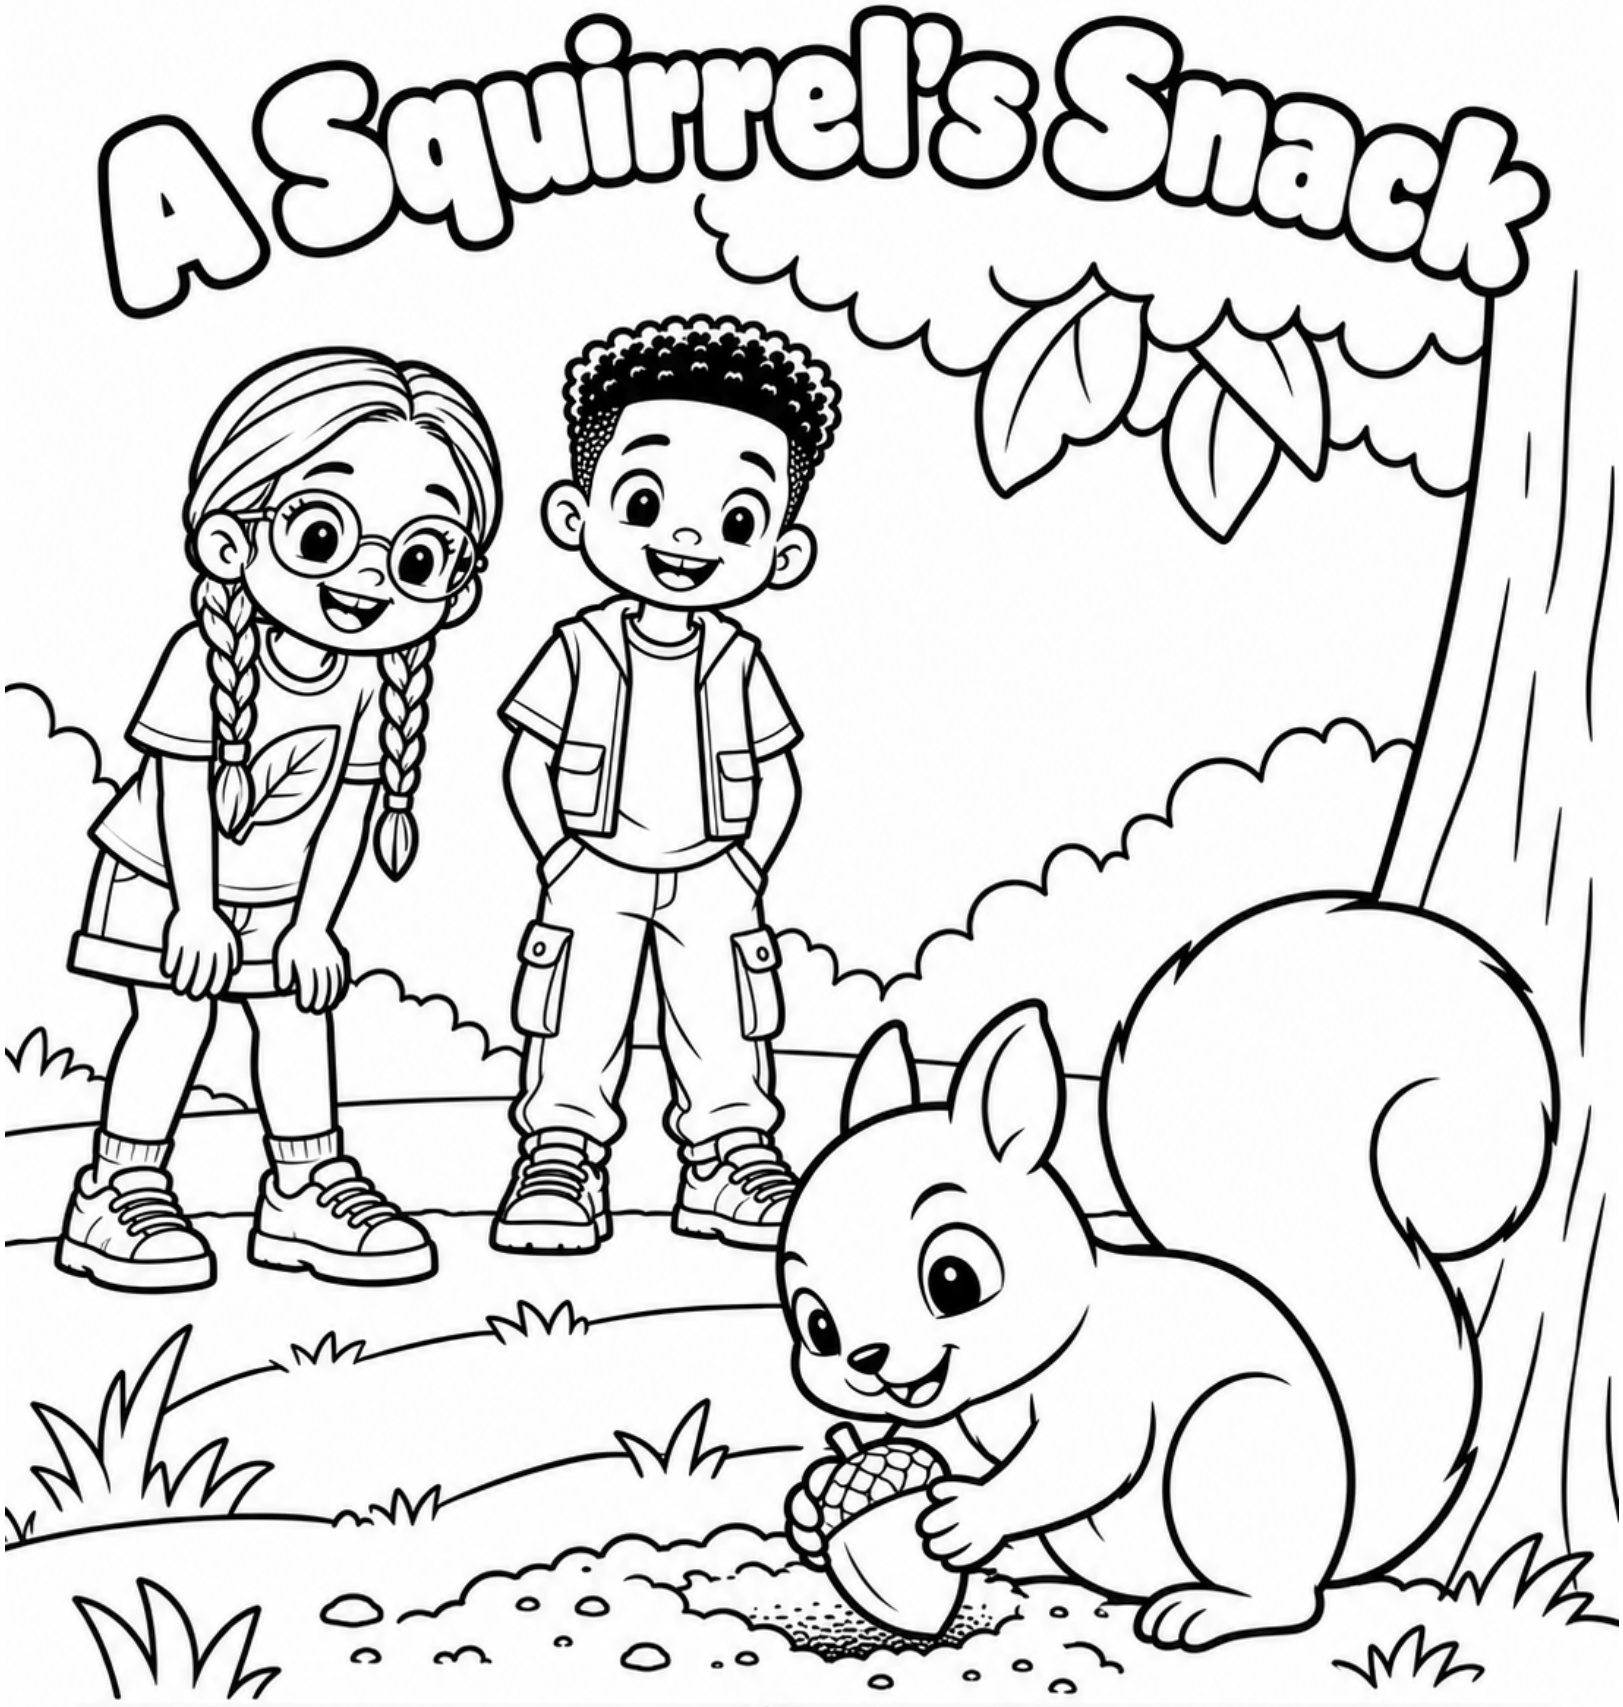

Red mangroves grow prop roots near the coast.
Their roots shelter small fish.

A Bird's Tree Home

Many birds build nests in trees.
Miles watches from a quiet distance.

A Squirrel's Snack

Squirrels eat acorns and other tree seeds. Some buried seeds later grow into trees.

Fallen Leaves Help Soil

Fallen leaves slowly break down.
They return nutrients to the soil.

Water for a Young Tree

Young trees need water as roots spread.
An adult helps choose when to water.

Mulch Around the Tree

Mulch helps keep moisture in the soil.
Leave open space around the trunk.

Room for Roots and Branches

Trees need room as they grow.
Adults choose a place with space above and below.

Growing a Shadier Future

Healthy trees offer shade and wildlife homes.
Sofia and Miles will care for their green world.
